RONDO-DAN

HE-VA Rondo-Dan

Tractor mounted round bale unwinder

Rondo-Dan is available in three models:

- Model H Unwinding to the right
- Model V Unwinding to the left
- Model H+V Unwinding to the right or left

The 3-point linked round bale unwinder RONDO-DAN is perfect for unwinding and feeding out round bales of straw, hay, silage and similar materials.

The RONDO-DAN is an optimal solution among other things:

- In feeding corridors where it is possible to work with a tractor.
- When feeding out in the field.
- When laying out straw in chicken houses or other live stock deep bedding.
- When laying out straw between rows of strawberries and carrots etc.

A unique feature on the machine are the twin-tined bale spears. The bale spears load the round bale onto the feeding platform. Without the driver or user of machine needs to leave the tractor seat, the bale spears can be docked into the feeder platform. Hereby the integrated hydraulic motor is automatically attached and the machine is ready for both transport and unwinding of bale material.

TECHNICAL SPECIFICATIONS

Model / Item no.	Unwinder direction	Working width	Length / Weight	Lifting requirement kg	Max. weight of bale kg	Max. bale diameter	Max. bale width
Model H - 2900201	Right	2.15 m	2.00 m / 577 kg	1,100	850	1.80 m	1.50 m
